

Dear Patients,

Thank you for choosing us for your care.

We are a clinical teaching site with TMU School of Medicine. Medical learners – such as medical students and resident physicians in-training—gain valuable experience by working with our physicians and providing high-quality patient care. These learners work under the close supervision of our physicians, who are always directly involved and available during your visit.

Our supervising family physicians are committed not only to your health but also to training the next generation of doctors. Your participation plays a vital role in this process, and we are deeply grateful for your contribution to medical education.

Your comfort and choice matter.

You are always welcome to decline involvement with a learner, either for a particular visit or in general. This will not affect the quality of your care in any way.

No matter what, your family physician remains responsible for your care and is always available to speak with you directly if needed.

Thank you again for helping us teach and support the future Family Physicians of Ontario!

We are now proudly affiliated with
